Terms of Sale

We guarantee that all seeds offered or sold by us to which the Seeds Act, 1920, and the Regulations made thereunder apply, have been tested in accordance with the provisions of the same. In accordance with the established custom of the Seed Trade, we give no other guarantee. It is, therefore, not a condition of sale, neither do we warrant, expressly or implied or under the terms of the Sale of Goods Act, 1893, or any statute or enactment, that the seeds, bulbs or roots supplied shall correspond with the description under which they are sold, and we will not be responsible for the crop.

The giving or sending of an order to us constitutes an acceptance of these terms by the purchaser, who, if he does not accept these terms, must return the goods forthwith.

•

FARMIX CATTLE CONCENTRATE

Use One Part Concentrate to Two Parts Grain for Feeding at 4lbs. Per Gallon

Danells Agricultural Supplies Ltd.

IN presenting this booklet we have endeavoured to give brief details of some of the goods and services we offer to local farmers. Our business, formed in 1945, has grown steadily from year to year, new customers have come along without the usual pressure from travellers and agents, and the saving in this respect has enabled us to give better service and value for money. Our Compounds, which we manufacture at Stanton Mill from locally grown cereals and the best protein obtainable, are proving a great success, and our customers are very satisfied with the results obtained. In our opinion there is still a great deal to be said for the small private firm giving personal service to its customers, even in these days of mammoth organisations. Seed Corn will be both scarce and expensive after the exceptionally bad harvest; even so, we have some grand lots of Scotch Seed Oats booked and the Wheat and Barley grown on Contract has produced some excellent seed in spite of the season. All farmers will be well advised to place their orders earlier than usual, not only for Seed Grain but for Clover and Grass Seeds as well.

These notes would not be complete without a few words about our new Concentrate for mixing on the farm. Well tried and tested, it is proving a blessing to those of our customers who have a surplus of their own grain. "Farmix," as we have named it, is a first-class Concentrate at a reasonable price. If you have not tried it, we would certainly advise you to give it a trial—we know you will be delighted with the results.

We invite your enquiries for anything connected with Agriculture.

L. YARWORTH DANELLS,
Director.
